

Gowtham Raj

Full Stack Developer

gowthamraj87544@gmail.com | +91 7904244346 | LinkedIn Profile

Professional Summary

Results-driven Full Stack Developer with over 2 years of hands-on experience designing and building scalable web applications and backend systems. Specialized in developing microservices architectures and deploying cloud-based solutions using AWS. Proven success in delivering high-performance, secure platforms like the cryptocurrency exchange Unicoindex. Strong background in REST API design, real-time data handling, and database optimization.

Technical Skills

Languages & Frameworks:

- JavaScript, TypeScript, Node.js, Express.js, Nest.js
- React.js, Next.js, Redux, Tailwind CSS, Material UI, Ant Design

Cloud & Infrastructure:

- AWS (EC2, S3)

Databases & Storage:

- MySQL, MongoDB, PostgreSQL, Redis, AWS S3

Tools & Methodologies:

- Microservices Architecture, REST APIs, WebSockets, Agile, Git/GitHub

Professional Experience

Full Stack Developer — The Mayavaram Financial Chit Corporation Ltd

Nov 2023 – Present

- Led the development of Unicoindex, a high-volume cryptocurrency trading platform, contributing to the user interface, CRM system, and admin dashboard.
- Engineered scalable REST APIs and backend services for trading operations, user management, and data analytics.
- Integrated WebSockets to stream live cryptocurrency prices with sub-second latency.
- Spearheaded a microservices-based backend architecture, improving system modularity and deployment speed.

- Optimized complex queries across PostgreSQL and MongoDB, reducing API response times by 30%.
- Maintained AWS infrastructure (EC2, S3), ensuring 99.99% application uptime.

Full Stack Developer — Cotyledon Technologies Pvt Ltd

Dec 2022 – Nov 2023

- Developed PickYourSlots, a cloud-based appointment scheduling platform for salons, gyms, and car washes.
- Built and deployed secure web applications with dynamic UIs using React.js and back-end APIs with Node.js.
- Architected backend services in a microservices model to improve scalability and maintainability.
- Integrated AWS RDS and S3 for persistent data storage and optimized data handling operations.
- Implemented authentication, data encryption, and access control mechanisms to harden platform security.

Education

Bachelor of Computer Application (BCA)

2015 – 2018

Hindustan College of Arts and Science, Padur, Chennai

Projects

Unicoindcx – Real-Time Crypto Trading Platform

2023 – Present

Built a real-time crypto trading platform with WebSockets, microservices (Node.js, Nest.js), and a responsive UI (Next.js, Tailwind CSS). Managed MongoDB integration and AWS infrastructure (EC2, S3) to ensure high availability and low-latency performance.

DevOps Automation Scripts

Developed shell scripts and small Node.js tools to automate AWS infrastructure tasks (e.g., S3 backups, EC2 instance cleanup). Used in internal projects to reduce manual overhead.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services (2023)
- Node.js – The Complete Guide (Udemy, 2022)
- Full Stack Web Development with React – Coursera (Meta, 2021)

Interests

Cloud Computing, Crypto Markets, Open Source Contributions, Performance Tuning, UI/UX Trends
